And eviction by a nazi from the Community "SAFETY" unit....

WELCOME to the RESET

Lohman want us to listen to his framework.

In a few sentences, serious for once, TCHC and its benighted satellites are corrupt beyond repair unless we fire or retire the individuals wh Edit Stats them that way.

In the case of my building I mean the so-called Tenant Services Coordinator, Karen Phillips, and the likewise so-called Operations Manager, Brad Priggin, because they have created and perpetuated a culture of feckless buck-passing non-accountability as well as collusion with both the Community "Safety" Unit and the Police, who are supposed to protect us but instead protect themselves by silencing us.

The misery that I experienced for nearly four years here went on unchecked because of Karen Phillips's non-performance of her job. This has seriously exacerbated a mental health condition that I have, and undermined my health. Mr Priggin himself did no more than his subordinate, and merely defended Ms Phillips from the criticism she deserved.

I note that during these disastrous times the building has been maintained by sanitary and janitorial staff whose performance has been nothing less than heroic. Upper management has typically been noticeable only by its absence, except when defending their deplorable record – by calling their police. They expect us to believe they're "working from home." They're drawing full pay. That I can believe.

That's it. That's all, folks. Good Night and Merry Christmas.

HI YOURSELF,

Inspector Lohman(e) is a character in Fritz Lang's "M" - is that really you, Willy? He was a Kiel; maybe you're his brother. As for the so-called "Accountability Framework," it's little more than what any informed tenant could tell you - FOR FREE - was the matter with his building. I stress FOR FREE, because it's sad to think that somebody got paid for this crap, which - without any details about implementation (which is what we so desperately need) is all it is. And considering that we are now supposedly somewhat along the way in terms of implementation, and that the problems remain worse than ever - lousy communication, half-assed repair jobs, degree zero **ACCOUNTABILITY** (ah! your WORD!) - it's less than crap. It's nothing.

I know you like the positive, but this time - at least so far as I am concerned - you'll have to content yourself with that FREE TIM HORTONS DOUGHNUT CARD. Sorry I missed out on it.

Hi All,

It was a pleasure to meet everyone today for a positive and engaging first meeting. I'm attaching a copy of the "Accountability Framework for the Integrated Service Model" that Maureen mentioned. It can provide answers to some of the questions that were raised today and opportunity to explore the ISM.
